DETAILED ACTION

1. This office action is in reply to an amendment filed on October 14, 2004. Claims **1,2,13,14,22,27** and **30** have been amended. Claim **21** has been cancelled. Claims **1-20** and **22-30** are pending.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. **Claims 1-12 and 13-20 and 22-26**, are drawn to a method of generating a pin, classified in class 380, subclass 44; and class 713, subclass 184.
 - II. **Claims 27-30** are drawn to a method of resetting a Pin in a secure device, classified in class 713, subclass 202.
3. The inventions are distinct, each from the other because of the following reasons:

The inventions in Group I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. For example, Group I is a method of generating a pin by generating a number of random binary bits, Group II is a method of resetting a Pin by sending a message to a data center having an original Pin. See MPEP 806.05(d).

Art Unit: 2132

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Applicants are advised that the replay to this requirement to be completed must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicants is reminded that upon the cancellation of the claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CR 1.48(b) and by the fee required under 37 CFR 1.17(i).
